Most human rights and fundamental freedoms are severely restricted in the country. For example, homosexual acts are usually sentenced to death, until June 2018 women are not allowed to drive vehicles and women’s right to vote was only recognised in 2011. Despite the latest developments, leading human rights groups, such as Amnesty International and Human Rights Watch, have consistently denounced the lack of protection of human rights in the Kingdom.[19] Internationally, although it is a country where Islam is strictly applied, it has strained relations with other Muslim countries. Iran, among others. Moreover, the Saudi monarchy is a vital military and oil ally of the European Union, Japan and, above all, the United States. In January 2016, he severed diplomatic relations with Iran following Iran’s protests over the execution of the Shiite clergy Nimr Baqr al-Nimr. In the Â® low emic pressure, apart from a small number of commercial urban settlements, such as Mecca and Medina, located in Hiyaz (Aryan speaker), most of what is currently Saudi Arabia was inhabited by tribal societies Â3 or covered by uninhabitable deserts.[35] The prophet of Islam, Muhammad, was born in Mecca near 571. At the beginning of VII d. C., Muhammad united the tribes of Arabia and created a single system of Islamic religious government. After his death in 632, his followers pitifully expanded the territory under Muslim rule, out of the peninsula, conquering a vast territory (from Iberia to India) Â3 in a matter of days. Thus, Arabia soon became a rich peripheral region of the Islamic world as the focus shifted to the more developed conquered lands.[36] From the 10th century to the early 20th century, Mecca and Medina were under the control of a well-known local ruler such as the Jerife of Mecca. But most of those times the Jerife must obey the ruler of one of the largest Islamic empires based in Baghdad, Cairo or Istanbul. Most of the other territories of what is now Saudi Arabia reverted to the traditional tribal structure.[37][38] In the 16th century, the Ottomans submerged the coasts of the Red Sea and the Persian Gulf (the Â3 region of Hiyaz, Asir and Al-Hasa).) to their Empire I, claiming sovereignty over the lands of the interior. The degree of control over these territories varied for the next four centuries according to the fluctuations of strength and weakness of the central authority of the empire.[39] In 1744, a local emir, Muhammad bin Saud, joined forces with an Islamic reformer, Muhammad ibn creator of the religious sect of Wahhabism, to create a new political entity, the Emirate of Diriyah. This first Saudi state was established around Riyadh, and rapidly expanded to control in a short time most of the current territory of Saudi Arabia. After the first state ended in the Ottoman Wahhabi War between 1811 and 1818, the Emirate of Nechd became the second Saudi state between 1824 and 1891. Abdelaziz bin Saud, first king of Saudi Arabia. The modern Saudi state was founded after the unification of Saudi Arabia by the last King Abdelaziz bin Saud (or Bin Saud). In 1902 Riyadh, the ancestral capital of the Al-Saud dynasty, was conquered by the rival Al Rashid family. Continuing his conquests, Abdelaziz subjugated Al-Hasa, Al-Qatif, the rest of Nechd and Hiyaz between 1913 and 1926. On January 8, 1926, Abdelaziz bin Saud became king of Hijaz. On 29 January 1927 he took the title of King of Nejd (the previous title of Nejd was that of the Sultanate of Nejd). With the Treaty of Yida, signed on 20 May 1927, the United Kingdom recognized the independence of the Kingdom of Abdelaziz (then known as the Kingdom of Nejd and Hijaz). In 1932, these regions were unified into the present Kingdom of Saudi Arabia. The discovery of oil in March 1938 economically transformed the country in an exceptional way, and since then has given the kingdom great legitimacy over the years. King Faisal was killed by his nephew on 25 March 1975 and was succeeded by Jalid. Today, Saudi Arabia maintains an intense economic relationship with many Western nations thanks to its oil resources. Adel al Jubeir is the first person to be Foreign Minister, since April 2015, without belonging to the House of Saud.[43] The political system of Saudi Arabia is the absolute monarchy, meaning that the king concentrates all authority, having under his control the legislative, executive and judicial power. According to Saudi Arabia’s Basic Law, adopted in 1992 by Royal Decree, the governor’s power is limited by Islamic law (known as Sharia) and KorÃÃÃ¨ n. The latter, together with the Sunnah, form the national Â3 constitution. Moreover, Saudi Arabia is still the only Muslim country that has already held elections.[45] There are no political parties, and according to The Economist, in 2010, Saudi Arabia was the largest authoritarian government of the 167 countries studied.[46] It is also not possible to say that the country’s political system is closely linked to Wahhabism.[48] The legal system is divided into two parts. The first is the Shura Council made up of 150 scholarly and experienced members chosen by the King, and the second is the Cabinet of Ministers, with a political profile, where ministers, all male members of the royal family, meet. The purpose of this body is to be able to discuss or discuss with the King the punishments to be applied to people who commit crimes.[49] Another aspect of the government for which the country is famous and has received many complaints and polices from many international organizations is the treatment of women, as they are not allowed to leave their families. homes, use public transport or travel without authorization Â3 o o otiram They are severely prohibited at driving, even if many do it to challenge the law and try to obtain greater freedom. , including minors.
